You may be on summer break but the animals still need to be taken care of every day. This camp will discover what it takes to be a zoo keeper, including cleaning up after animals, feeding them, and making fun enrichment. We'll even investigate animal and environment focused careers at the Zoo and beyond.	Change is on the horizon for the Little Rock Zoo with the completion of new exhibits! Campers will get a sneak peek at what goes into the creation of an exhibit, learn about how zoos provide animals everything they need, and design exhibits of their own.	Plants and animals have inspired different human innovations, like bullet trains, drones, and Velcro. Monday through Wednesday, we'll explore the nature side of those innovations. On Thursday and Friday, the Arkansas Innovation Hub will provide campers with hands-on experiences through the use of fun technology related to what the campers have learned.
